Non-Pan Forming Tiller

A model C 1300 that works 51.57 inches wide and is 56.30 inches overall is in stock now. This unit has a multiple speed gearbox and a rotor like the one shown on Rotoking machine. The tines are replaceable and enter the ground vertically and are spike like. This is because each tine is mounted on a bracket fixed to the rotor holding it at correct angle to allow the "spike" to enter the ground vertically. They do not create a work pan no matter how often they turn the ground. Hence, the machine is ideal for organic and biodynamic growers. The price is just \$5,000.00 FOB California.
