Appropriate Technology for Organic Agriculture

As an Organic Grower you know what needs to be done to produce a high quality product. You also know that smaller scale growers have the most to gain from mechanization because you must do it all yourself—grow, harvest, add value and market.

For 23 years Ferrari Tractor CIE has located and supplied the best equipment for every job from walk behind tools to larger scale tractors and implements. Whatever your crop and whatever your scale of operation high quality innovative machines are available to help you produce efficiently.

Here are a sample from hundreds of machines available.
