## Bee-Dazzled

Bi-directional Ferrari tractors 35 to 83 HP are ideal for spotting pallets of Beehives. True 4 X 4 drive, equal weight distribution on all four wheels, low center of gravity and terrific maneuverability make Ferrari articulated models ideal for forklift work. Compact dimensions and fast all terrain capacities make them easy to move around. Remove the forklift mast and turn driver module 180 degrees and in less than a minute you have the use of a modern multifunctional tractor.
