

Corn Forage Harvesters

Ideal small scale corn forage chopper with self contained collection Hopper with side conveyor lets you take down cornstalks one row at a time, chop them and then deliver them fresh to the feed bunks with a single machine. In transport mode the machine tracks directly behind the tractor and is 85" outside to outside. When in cutting mode it shifts to right to cut one row of corn just to right of tractor tire. The model TD 400 requires 40HP tractor and holds 3 cubic meters of chopped corn and costs \$25,000 at your nearest port.

Model 343 in transport mode.

Model 343 in working position

Another manufacturer offers a corn chopper that blows chopped corn into a separate wagon. This simpler version is 3 pt. mounted and in cutting mode operates to the right of tractor. When in transport mode it can pivot 180 degrees so that is directly behind the tractor allowing it to pass through any gate the tractor can. The model 343 costs \$14,000 Fob Portland, Oregon.
