

Self Propelled High Density Greens Seeder from Dema

Dema has long produced a precision seeder for high density planting of greens and herbs, in several forms 3pt for tractors and one for walking tractors. The new "Prestige 1200" takes it a step farther using a 12.5 HP air cooled, diesel engine to drive a hydrostatic transmission that powers the rollers, giving infinite speed control and smoother starts and stops. The drivers platform and back rest reduces fatigue and, combined with steering wheel controls, improves control performance. This is ideal for indoor or outdoor growing; its 48" working width is ideal for smaller growers in this competitive business. Cost \$16,000.⁰⁰
