## Small Scale Bedshaper

Now available, a small scale powered bed shaper/stoneburrier. This specialized tiller creates a raised finished bed and in the process sorts out small stones, twigs, roots and pieces of sod and burys them leaving several inches of clean soil on top of bed. This unit tills 39" wide creating a flat 22" wide bed top with tractors of 20 or more PTO HP.

Not only does this make a perfect bed in clean ground it is a fast labor saving way to clean beds for sequential planting in the season by burying previous crops residues. This machine is also the ideal secondary tillage after spading, discing or plowing. The RSG100 unit is \$12,750 (3/11/10). Because it takes the place of a rototiller and performs several labor intensive jobs in one pass it's price will quickly be recovered. Many larger sizes also available including units to create several beds at a time. An RSG125 tills 58" wide creating a bed top 33" wide at cost of \$13,250.
