## Transporter

Ubiquitous in Europe and only relatively recently finding a market in the USA is the "transporter". Designed around a stretched out tractor chassis this all terrain vehicle offers a 3 way tipping bed and rear PTO. With its low center of gravity it works well on slopes and compact dimensions allows it to be used in the woods for light forestry as well as in agriculture. Various specialized beds can be mounted for compost and manure spreading and loose hay harvesting. The standard 540 RPM PTO invites its use to replace a tractor in certain haying, seeding or spraying tasks.
