

Portable Thresher

This small thresher is designed for substantial production of cereal grains, rice, wheat, barley and the like and can be equipped to also do soybeans and other small beans. It is simple in design and built for sustained use in the third world providing threshing capacity for entire villages. Well organized input of a good crop can produce 600 kg per hour output of wheat. The Italian manufacturer has built threshers since 1875. Their model "Trexia" is available for \$12,000 at closest port. You add a 6 HP Honda or similar and you are ready to process your crop. A PTO driven model is also available for \$12,500. A seed Cleaner attachment is included as are alternative rasp bars to thresh beans. Prices quoted are based on today's (9/30/09) exchange rate of 1.46 per Euro.
