

Vineyard Drills

The only domestic manufacturer of small, high quality drills is here in California and these are only for 3 point mounting. These units are almost exclusively sold to the vineyard industry so they are built in small batches during July or August each year and are often unavailable the rest of the year. These are very solid well made units with double disc openers and individual covering wheels for each drill line. If you want one of these you must order and get on waiting list. Pictured to the left is a 60" model with (8) openers - Price \$7,500. There are models 36", 48" and 72" as well. You can also convert these to no till versions for another \$4,000.

This same manufacturer also makes a simpler 3 pt. model called an "S" tine seeder in 36", 48", 60" and 72" models. The 60" model has 8 openers and sells for \$4,500.
