## **Walking Compost Spreader**

New functional compost spreader you push, ideal for market gardeners and flower growers. Spreads 24 inch swath of compost, steer manure, greensand, vermiculite and all sorts of soil amendments. Holds 3 cubic feet at a time, the volume of typical bagged products.

Tipping it back on two rear wheels allows you to move it about like a wheelbarrow, then tip it up on to all four wheels to begin spreading. Front end wheels power the spreading drum, mesh covered drum gives even spread of material. A sliding gate at front controls volume of output.

Well designed and made this compact spreader is a valuable and practical tool that saves time and effort and efficiently applies expensive inputs, soon recovering your initial investment of \$895.<sup>00</sup>.
